## CONFIDENTIAL

In rebruary 1949 when on a south-bound train

a freight train which overtook the PW-train at several
railroad stations on the way from TALIMN to KIEV. The
freight train carried 20 boats of the type described under
para 1. Some of the P/s had loaded the boats in TALIMN
two days before, after the engine plants of the boats had been
overhauled.

Comment:

25X1

÷r

The boat mentkoned under paras 1 and 3 was obviously of the small speedboat (E-boat) type or, as no torpedo armament was observed, a motor mine sweeper. The train was probably bound for the Black Sea-NIKOLAYEV. The type in para 2 is presumably a patrol vessel and, due to her wooden hull, is comparatively insensitive to magnetic mines.
